Alisema mfumo huo pia unaiwezesha serikali kutoa fedha kwa njia ya ufadhilli wa masomo na mikopo kwa wanafunzi kwa kutege-me mwongozo wa kupima uwezo wa kila mmoja.

"Mfumo huo pia hutoa vigezo halisi vya ufadhilli kulingana na gharama ya programu za Chuo Kikuu," aliongeza Katibu.

Vilevile, Dkt Inyangala alisema formula hizo mpya zinarahisishia vyuo vikuu kunufaika na njia mbalimbali za ufadhilli, ikiwa ni pamoja na ufadhilli wa wanafunzi, ruzuku ya utafiti, ruzuku ya miundombinu ya mitaji pamoja na huduma za ushauri.

Kuhusu uainishaji wa waombaji, katibu alisema kuwa NFM inaweka wanafunzi katika makundi matano kulingana na vi-wango vya mapato ya familia.

Takwimu hizi, kwa mujibu wa katibu, ni msingi ambao Wizara itakita mipango, sera na mikakati yake ya kuboresha mazingira ya elimu nchini.

"Data sahihi ni mu-

himu. Inatusaidia kutambua mapungufu na tofauti ndani ya mfumo wetu, na kutowezesha kuyashughulikia kwa ufanisi. Pia inatuwezesha kuelewa ni wapi rasilimali zinahitajika zaidi na kuhakikisha kuwa kila mtoto, bila kujali asili yake, anapata elimu bora," Dkt. Kipsang alisema.

Aliongeza kuwa maamuzi yanayotokana na data husababisha matokeo bora ya elimu, kuboresha mazingira

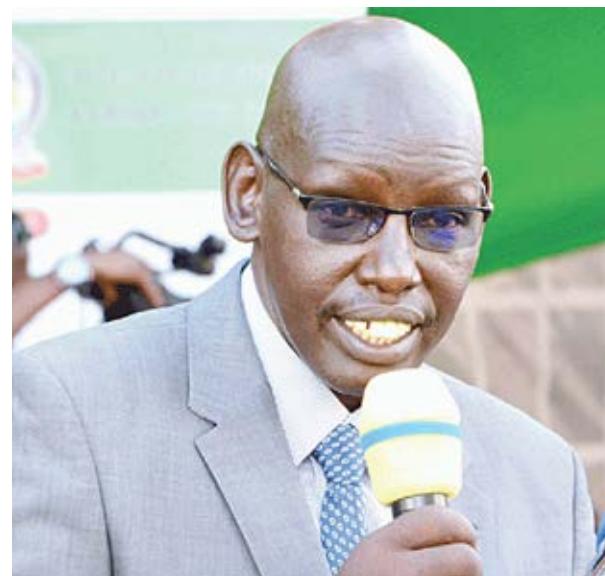

“Hii inamaanisha vifaa bora, mafunzo zaidi ya walimu yaliyolengwa

ya shule, na usambazaji sawa wa rasilimali.

Akizungumza wakati wa hafla katika Shule ya Wasichana ya Moi jijini Nairobi, katibu alisema manufaa ya sensa hiyo ni makubwa na kwa taarifa zitakazokusanywa, Wizara itaweza kupanga kwa ufanisi zaidi, kutenga rasilimali kwa ufanisi zaidi, kufuatilia na kutathmini mipango ya elimu ya nchi kwa usahihi zaidi.

"Hii inamaanisha vifaa bora, mafunzo ya walimu yaliyolengwa zaidi, na uboreshaji wa maendeleo ya mtaala, yote yakilenga kukuza mazingira mazuri ya kufunza wanafunzi wetu," aliongeza.

Akitoo wito kwa wasimamizi wa shule, walimu, wazazi, na wanafunzi

Katibu Dkt Belio Kipsang

kushirikiana kikamilifu katika kuhakikisha kufaulu kwa mchakato huu, Dkt. Kipsang alibainisha kuwa sensa sio tu mpango wa serikali, lakini juhud za pamoja zinazohitaji ushirikishwaji wa washikadau wote.

"Kushiriki kwenu ni muhimu ili kuhakikisha

usahihi na ukamilifu wa data tunayokusanya," alisitiza.

Aidha, alieleza kuwa Wizara itatumia teknologia ya hali ya juu na mbinu bunifu ili kurahisisha ukusanyaji na uchakataji wa takwimu, na kuitaja mbinu ya kufanya sensa kuwa ya uwazi.

Alisema, hii itasaidia Wizara kuepuka changamoto kama vile masuala ya vifaa na kuhakikisha uadilifu wa takwimu huku Serikali itaendelea kuwa imara katika dhamira yake ya kuboresha ubora wa elimu ya msingi.

Zaidi ya hayo, Dkt Kipsang alifichua kuwa Wizara inaendelea na mipango ya kuimarisha viwango vya elimu na miundombinu na kwamba ufahamu utakaopatikana kutockana na sensa hii utaarifi sera zake ambazo zitasaidia kuleta mageuzi ya muda mrefu.

"Tunatambua changamoto zinazowezekana katika kufanya sensa, kutock kwa vikwazo vya vifaa hadi kuhakikisha usahihi wa data. Hata hivyo, tumeweka mikakati madhubuti ya kushugulikia masuala haya, ikiwi ni pamoja na kutoa mafunzo ya kina kwa wakusanyaji wa takwimu na mbinu madhubuti za uhakiki wa takwimu," alisema.

Meli ya watalii yahimili kimbunga 'IALY' kufika bandari ya Mombasa

NA SADIK HASSAN(KNA)

Zaidi ya watalii 300 waliokuwa kwenye meli ya Ms Insignia walivumilia upepo mkali na dhoruba iliyosababishwa na Kimbunga cha Tropiki 'IALY,' ambayo ilipiga pwani ya Kenya, na kutua katika Bandari ya Mombasa.

Kulingana na Idara ya Hali ya Hewa ya Kenya (KMD), IALY iliongezeka hadi kufikia kimbunga

cha kitropiki. Kitasalia katika bahari licha ya kupita ndani ya kilomita 150 kutoka pwani ya Kenya.

Meli zinazotua katika Bandari ya Mombasa hazikuathiriwa na kimbunga hicho. Meneja wa meli hiyo Laurence Badasse iliyokuwa na abiria 357 na wafanyakazi 396 alieleza kuwa chombo hicho hakikuwa kimeja kwani baadhi ya abiria walishukwa Dubai.

Meli hiyo yenye bendera ya Visiwa vya Marshall yenye umri wa miaka 26 ilipaswa kupita kwenye Suez Canal lakini ilirudishwa Afrika kwa sababu ya mzozo wa usalama kwenye Bahari ya Shamu. Meli zililazimika kuititia Cape of Good Hope nchini Afrika Kusini kufikia Ulaya.

rani Afrika kufikia Ulaya ya wageni wetu walipewa kwani Suez Canal sio fursa ya kurudi nyumbani salama kwa hivyo baadhi ikiwa hawakutaka safari

hiyo mpya. Kwa kawaida, tungekuwa tukisafiri na wageni 608," alisema Badasse.

"Tulitaka sana kuja Kenya hivi kwamba tulistahimili dhoruba iliyo-safiri kati ya Madagascar na pwani ya Kenya. Tulikuwa na siku mbili za hali mbaya ya bahari kabla ya kufikia. Tunafurahi kwamba tumefanikiwa kwa wakati na kwa usalama," aliongeza.

Kituo kinachofuata cha meli hiyo ni Zanzibar, kabla ya kuelekea Msumbiji na Cape Town kabla ya kurejea Ulaya.

NOTICE TO THE PUBLIC TO SUBMIT COMMENTS ON AN ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE CONSULTANCY SERVICES FOR DETAILED DESIGN OF NAMANGA DAM WATER SUPPLY AND SANITATION PROJECT

Pursuant to Regulation 21 of the Environmental Management and Coordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent Tanathi Water Works Development Agency intends to construct a dam which will involve gravity flow distribution of treated water. The design capacity of the proposed dam is 74167M³/day. The proposed dam will submerge the existing two rivers dam and therefore the current production (12000M³/day) of the existing two rivers dam will be lost. The selected dam type is Roller Compacted Concrete Dam(RCC)of structural height 39.3m high with an Overflow Ogee Spillway(126m) stepped spillway chute and a stilling basin. Other key features of the proposed dam include: Riverbed Elevation(2150masl), Storage Level(2173.55masl), Full Supply Level(NWL);2180.3Masl), maximum water level at floods (2182.80masl), Dam Crest Level (2184.5masl), Dead Storage 6.62Mm³, Live Storage 9.06Mm³,Total Dam Volume 15.686Mm³, Area Inundated at Full Supply Level 1.74Km². The raw water from one river will be transmitted to the Namanga Water Works for treatment before distribution to consumers. The project will be located in Namanga town in Kajiado County.

The following are the anticipated impacts and proposed mitigation measures:

IMPACT	MITIGATION MEASURE
Loss Of Biodiversity (Flora)	<ul style="list-style-type: none"> Where possible, clearing of vegetation more so the indigenous trees need to be avoided during construction as much as possible. Where clearing of trees is inevitable, the land should be landscaped and planted with as much indigenous vegetation as possible so as to restore the lost biodiversity. The extent of clearing within the work stations should be clearly marked. Instruct all construction workers to restrict clearing to the marked areas and not to work outside defined areas. Avoid introduction of invasive alien species in the landscaping activities.
Increased soil erosion	<ul style="list-style-type: none"> Pile the top soil where it can be reused Soil erosion control measures should be undertaken to avoid erosion in sensitive areas and those prone to erosion Rehabilitation of degraded environment should be undertaken to stabilize the soil and therefore reduce rate of soil erosion and siltation. Soil conservation measures should be observed especially at stockpiled areas. Bare areas should be landscaped after completion. Operations will be timed to take place during the dry season when soils are dry to reduce soil compaction. Re-vegetation should be enhanced to reduce run off.
Disruption of movement during Construction	<ul style="list-style-type: none"> Where such excavations are wide, foot bridges should be erected at the livestock corridors to facilitate their movement. Since this is a short-lived occurrence, the contractor should engage local people to make them understand the importance of the exercise and encourage them to use other alternative routes.
Removal and disposal of asbestos pipes	<ul style="list-style-type: none"> Asbestos containing pipes be replaced with other pipe types. Before disposal commences, an environmental audit should be conducted. The disposal of asbestos should be guided by the "Asbestos management plan (AMP)". The asbestos material should be conveyed, handled and distributed in a safe manner so as not to cause any ill effects to any person or the immediate environment. The onsite and offsite disposal sites shall be marked clearly as asbestos hazard area in accordance with the National Guidelines on Safe Management and Disposal of Asbestos Removal including Onsite/offsite disposal of asbestos shall be subjected to environmental impact assessment in accordance with the Environmental (Impact Assessment and Audit) Regulations, 2003
Air pollution	<ul style="list-style-type: none"> Use of water sprays when dusts are being generated or at times of strong wind All materials stored or stockpiled on site should be adequately covered Maintain machineries at manufacturer's specifications of minimizing emissions. Where unavoidable, construction workers working in dusty areas should be provided and fitted with respirators or personal protective equipment Conduct air quality analysis regularly Cover all trucks hauling soil, sand and other loose materials to avoid spillage and dust emissions that may interfere with smooth motoring Site roads should be dampened every 4-6 hours or within reasonable interval to prevent dust nuisance and on hotter days, this frequency should be increased Cover or wet construction materials such as sand and unpaved areas with gunny bags to prevent dust nuisance.
Excess noise and vibrations	<ul style="list-style-type: none"> Use of equipment that is fitted with noise reduction devices such as mufflers. Construction workers operating equipment that generates noise should be equipped with noise protection equipment Machines should be maintained at manufacturers' specifications
Solid and liquid waste generation and management.	<ul style="list-style-type: none"> A waste management plan should be adopted as part of the construction works. Hazardous substances should be handled safely and at designated and safe area. Identify areas where re-fueling and vehicle maintenance activities and storage of hazardous materials will be permitted. Skips and bins should be strategically placed within the campsite and construction site. Skips and bins should be adequately designed and covered to prevent access by vermin and minimize odour. They should also be emptied regularly Careful pumping of sewage from upstream manholes to downstream manholes Block off the main trunk line to minimize chances of exposing staff to raw sewage during work. Measures to ensure that waste materials from the Project are disposed at suitable sites should be taken. These will include engaging only reputable truckers and conducting appropriate spot checks to verify that disposal are done in accordance with the requirements of NEMA
Changes in hydrology/ impended drainage/deep excavations	<ul style="list-style-type: none"> Release of adequate water for the downstream communities and aquatic organisms The amplitude of this impact will be sized during the continuation of the hydro sedimentology studies that will detect the need or not to take direct control actions, as the dredging of the sandy sediment. The bottom discharger may collaborate in reducing the sediment build-up in the reservoir area. Application of rainfall and meteorological stations in the monitoring water supply for continuous follow-up of the climatic conditions. Earthworks should be restricted to construction sites Install warning signs and lightings at both deep and shallow trenches Backfilling trenches as soon as works are completed Provide temporary bridges and protection rails at deep trenches to facilitate people movement.

IMPACT	MITIGATION MEASURE
Traffic obstruction	<ul style="list-style-type: none"> Ensure all construction vehicles to and from the construction site use the designated Entry/Exit to the project site. Construct traffic diversions. Sensitize truck drivers to avoid unnecessary road obstruction. Contractor should stick to the provided timeline for completion of works of the Project
Occupational safety and health	<ul style="list-style-type: none"> There should be adequate Personal Protective Equipment (PPE) to all workers and they should be worn all the time. There should be adequate provision of the requisite sanitation facilities for human waste disposal. Workers should receive requisite training especially on the operation of the There should be adequate warning and directional signs. Provide clean drinking water for the employees. Develop a site safety action plan detailing safety equipment to be used, emergency procedures, restriction on site, frequency and personnel responsible for safety inspections and controls. A sign board warning on HIV/AIDS, drugs and alcohol abuse be displayed at the construction camp sites The campsites and their facilities need to be constructed at sites carefully selected away from the sensitive areas. Rehabilitate excavated sites soon as construction is complete. Train workers on the use of firefighting equipment. Provide First Aid kit within the construction site. Recording of all injuries that occur on site in the incident register, corrective actions for their prevention are instigated as appropriate. Provide prevention tools such as condoms at the health Centre and construction site to all. Contractor to ensure compliance with the Workmen's Compensation Act, ordinance regulations and union agreements. Guide all workers in Safety Health and Environment (SHE).
Fire risks and emergency preparedness	<ul style="list-style-type: none"> Put "No Smoking Signs" in areas where inflammables are stored. Guide all workers in Safety Health and Environment (SHE). Provide adequate firefighting equipment capable of fighting all classes of fire. Provide first Aid kit within the construction site. Label all inflammable materials and store them appropriately There should be adequate PPE to all workers and should be worn all the time. Conduct regular fire-fighting drills. Develop a fire fighting emergency plan. Train one member of staff on fire preparedness
Displacement of the affected people.	<ul style="list-style-type: none"> Sensitization of stakeholders and land owners in decision making at all levels. Compensate all the PAPs affected by the land take. Provide alternative land of similar value to the PAPs. Avoid areas with heavy residential buildings as much as possible. Issue advance notices to all affected individuals before commencement of property demolition exercise. A Resettlement Action Plan Report (RAP) and valuation of assets has been undertaken. It is advisable that compensation be done before project commencement
Increased insecurity	<ul style="list-style-type: none"> Provide day and night security guards. Provide adequate lighting within and around the construction site
Gender Based Violence / Child protection	<ul style="list-style-type: none"> Sensitization on Gender based violence through posters, tool talks for workers Develop a GBV mechanism to deal with grievances Develop a policy against GBV All workers and employees to sign a Code of Conduct that clearly explains the related policy All employed will be expected to submit their ID to establish their age
Influx of immigrants in search of employment opportunities	<ul style="list-style-type: none"> Priority (70%) should be given to employing staff from the local community Review the construction activities to integrate with the HIV/AIDS campaigns; Develop appropriate training and awareness materials for Information, Education and communication (IEC) on HIV/AIDS; Identify other players (local CBOs, NGOs, and government organizations) to assist in the dissemination of the awareness of HIV/AIDS for enhanced collaboration; Develop an intervention strategy compatible with the construction programme to address success of the HIV/AIDS prevention and provide peer educators for sustainability in collaboration with other stakeholders; and Integrate monitoring of HIV/AIDS preventive activities as part of the construction supervision. Basic knowledge, attitude and practices are among the parameters to be monitored, and particularly on provision of condoms, status testing and use of ARVs.

Mashirika yaonywa dhidi ya kufuja fedha za misaada

**NA MUNYASIA MUSYA
(PCO)**

Waziri la Ju-muiya ya Af-rika Mashariki, Maeneo Kame na Mae-ndeleo ya Kikanda Bi Penin Malonza ameya-taka mashirika yasiyo ya kiserikali yanayoijusisha na misaada ya kibin-adamu kwa wahanga wa mafuriko kutumia vyema fedha yanazochangisha ili kupunguza mateso ya jamii zilizoathiriwa.

Malonza alisema kuwa mashirika mengi yanachangisha fedha na aina nyingine za usaidizi kwa waathiriwa wa mafuri-ko, lakini rasilimali haz-ifiki waathiriwa.

"Mtu asichukue fursa ya mateso ya wahasiriwa wa mafuriko kwa kuchangi-sha fedha lakini kisha kuz-iweka mfukoni badala ya kuzielekeza kuwasaidia," alisema. Hata hivyo, alishukuru mashirika ya nchi zilizo na uhusiano na Kenya, mataifa rafiki, na washirika wengine ambao wamejitokeza kusadia waathiriwa wa mafuriko kote nchini.

Akizungumza katika eneo la Tara wakati wa ziara yake katika Kaunti ya Tana River kutathmini uharibifu wa mafuriko katika kaunti hiyo, Malonza alisema serikali imejitolea kubabiliana na mafuriko yanayoendelea katika eneo hilo. Alisema Seri-

kali itawahamisha watu wanaoishi kwenye ardh kando ya Mto Tana ili ku-saidia jamii za wafugaji wanaoishi kwenye Tana Delta.

Pia alishuhudia usambazaji wa chakula na misaada isiyu ya chakula kwa wa-hanga wa mafuriko ambayo ni pamoja na mchele, maha-rage, Unga, magodoro na vifaa vingine vya nyumbani.

Katika ziara hiyo, alitembe-lea Garsen, Tara, Marafa, Hola mion-goni mwa maeneo mengine ambayo mafuriko yameharibu miundombinu, masha mamba na shule zilizosongwa, nyumba na vifaa vingine vya umma na vya kibinagsi.

Seneta wa Tana River Danson Mun-gatana aliitaka Seri-kali kuharakisha ujenzi wa Bwawa la High Grand Falls kando ya Mto Tana ili kuzuia mafuriko katika kaunti hiyo.

Alisema eneo hilo halikuwa na mvua hata kidogo lakini mafuriko hayo yal-isababishwa na maji yaliyokuwa yanta-ka Mlima Kenya na kumwagika kutoka kwenye mabwawa

yajuu ya mto huo.

Mbunge wa Garsen Ali Wario alisema asilimia 80 ya Eneobunge la Garsen lilifurika na kuacha zaidi ya shule 15 za msi-ngi zikiwa zimesombwa

au kuharibiwa sana na mafuriko. Alisema watoto wengi bado hawajarejea shulen na kuiomba Seri-kali kuwasaidia katika ujenzi wa shule hizo.

Kamishna wa kaunti ya

Tana River David Koskei alisema zaidi ya nusu ya kaunti hiyo iliathiriwa na mafuriko.

Alisema kuwa Serikali za Kaunti na Kitaifa, vi-ongozi wa eneo hilo na

washirika wa maendeleo wanashirikiana kuandaa mpango mkakati wa kuleta suluhu la kudumu la mafuriko yanayoendelea na kuyageuza maji kuwa matumizi ya faida.

Kaunti ya Kakamega yazindua mpango wa chanjo ya ng'ombe bila malipo kulinda afya ya mifugo

NA MELECHEZEDECK
EJAKAIT(KNA)

Serikali ya Kaunti ya Kakamega imeanza kampeni kabambe ya chanjo ya ng'ombe bila malipo ili kuzuia uwezekano wa kuenea kwa magonjwa katika kaunti hiyo kutoka kaunti jirani za Bungoma na Trans Nzoia.

Magonjwa yanayolengwa ni Miguu na Midomo, kuvimba ngoi, Maji Nyesi, na Kimeta katika ng'ombe, huku mbwa na paka wakipewa chanjo ya kichaa cha mbwa.

Akizungumza wakati wa uzinduzi wa kampeni hiyo katika eneo la Koromait eneo la Chekalini katika Kaunti Ndogo ya Lugari, Afisa Mkuu wa Uzalishaji Mifugo, Huduma za Mifugo na Maendeleo ya Uvuuvi, Jessica Wesonga, alisema wanalenga asilimia 100 kote kaunti hiyo.

Wesonga, ambaye aliwataka wakazi kutoa mifugo yao kwa chanjo, alisema kampeni hiyo inalenga kuimarisha afya ya ng'ombe na kuboresha uzalishaji wa mifugo sawa na ajenda ya Gavana Fernandes Barasa ya kuboresha utoshelevu wa chakula na uzalishaji mali.

Alisema: "Tuko tayar, na chanjo zinapati-kana. Ninatoa wito kwa wakulima wote kuwapatia mifugo wao chanjo, ambayo ni bure.

ndio maana tunazindua kampeni ya chanjo katika kaunti ndogo za mpakani ili wakulima wetu wasipate hasara." Alisema kuna chanjo za kutosha na lengo la idara yake ni kufikia asilimia ya chanjo

ndani ya muda mfupi iwezekanavyo.

"Kwa chanjo zitakazosalia tutaziweka katika makao makuu ya kaunti ili wakulima amba mifugo yao itakuwa hai-jachanja ndani ya muda

uliowekwa wawapeleke huko," alisema.

Wesonga alifichua kuwa hivi majuzi idara yake ilifanya zoezi jingine la chanjo ya mifugo liliolofaulu katika kaunti ndogo za Ikolomani na Shinyalu kufuatia mkurupuko wa ugonjwa wa Kimeta.

Mkurugenzi wa Huduma za Mifugo wa Kaunti hiyo Christopher Kadenge alisema zoezi la chanjo dhidi ya magonjwa yaliyoorodheshwa ni muhimu kwa wafugaji na watahakikisha wanapata faida bora kutoka kwa ng'ombe wao na maziwa yatakuwa bora.

"Magonjwa hayo tayari yanaathiri ng'ombe katika kaunti jirani. Tunachukua tahadhari kwa kuwachanja mifugo yetu ili kuwakinga na magonjwa hayo na kusababisha hasara," alifafanua.

Kadenge alisema mbwa na paka pia watapewa chanjo ya kichaa cha mbwa na wamiliki kuperwa vyeti.

Hata hivyo alisema kwa mifugo hao, hakutakuwa na utoaji wa vyeti ingawa wanatafakari kufanya hivyo katika siku zijazo ili kuhakikisha wafugaji wanapata chanjo ya mifugo yao yote. "Pia itakuwa ishara kwamba unathamini kampeni ya kaunti dhidi ya magonjwa ya wanyama mara tu un-apopeleka ng'ombe wako sokoni kuuza," alieleza.

Mvurya alielezea matumaini kuwa mradi huo mkubwa

katika kaunti za Turkana na Marsabit utawananufaisha wakazi wa kaunti hizo mbili pindi utakapoanza. "Tumekuwa na uhushiano mzuri sana baina ya nchi na Uholanzi ambao ulianza mika minge iliyopita, na ushirikiano umekuwa mzuri. Sababu ambayo balozi yuko hapa ni kwamba tumekuwa tukifanya kazi katika mradi katika Ziwa Turkana ambao utaghrimu Euro milioni 10,

takriban Sh1.5B," Waziri alisema. Waziri alisema hayo alipozungumza na wanahabari baada ya mukutano na Balozi wa Uholanzi anayeondoka Maarten Brouwer, ambaye alimtembelea ofisi yake katika makao makuu ya Wizara jijini Nairobi. "Balozi amekuja kutuhakikishia kwamba ingawa amekamilisha kazi yake nchini Kenya, ushirikiano huu utaendelea," Waziri alisema. Alidokeza kuwa baadhi

ya shughuli za kimsingi za mradi huo wa Sh1.5 bilioni zimeanza, lakini utaanza kikamilifu Septemba mwaka huu.

Miradi mingine am-bayo serikali za Kenya na Uholanzi zimekuwa zikishirikiana ni katika maeneo ya usalama wa baharini na ujenzi wa meli za baharini, Waziri alisema. "Meli tulizojenga Kisumu na Mombasa zilitokana na usaizidi wa Serikali ya Uholanzi. Pia tumefanya kazi pamoja Pwani

katika mpango unaoitwa 'go-blue' ambaulihusisha nchi zote za EU," aliongeza.

Ikiwa ni sehemu ya jitihada za Serikali za kufufua uchumi wa Baharini na sekta ya uvuvi, Mvurya alisema hivi karibuni alitembelea Ziwa Turkana ambako alitangaza dhamira ya wizara yake ya kuanzisha maeneo mawili ya kutua samaki katika pande zote za ziwa hilo kwa gharama ya Sh300 milioni.

Waziri apendekeza ujenzi endelevu ili kukabiliana na mabadiliko ya hali ya hewa

BY JOHN KINUTHIA(PCO)

Wataalamu wa mazingira wa mapeewa changamoto ya kubuni na kujenga majengo endelevu zaidi yanayostahimili athari mbaya za mabadiliko ya tabianchi.

.Waziri la Ardhi, Ujenzi wa Umma, Nyumba na Maendeleo ya Miji Alice Wahome alibainisha kuwa majengo sio tu mündo ambayo hutoa makazi lakini ni inachangia pakubwa utoaji wa gesi chafu wakati wa ujenzi, wakati yanatumika na wakati wa ubomoaji.

Zinachangia sehemu kubwa ya uzalishaji wa hewa ya kaboni duniani, aliongeza, akisema kuwa nishati inayotumika kustawisha nyumba na ofisi, pamoja na vifaa vinavyotumika katika ujenzi, inaathiri mazingira.

Waziri huyo alikuwa akiwahutubia wataalamu wa mazingira katika hoteli moja Nairobi alipofungua rasmi Kongamano la Kitaifa la Majengo na Mabadiliko ya Tabianchi nchini Kenya hivi majuzi.

Washiriki walitoka Idara ya Serikali ya Kazi za Umma, sekta ya kibinasi, Afisi ya Mikakati na Utekelezaji katika Ofisi ya Rais, wawakilishi kutoka UNEP, UN-HABITAT, pamoja na wale kutoza balozi za Ufaransa na Uholanzi, Serikali ya Kaunti ya Nairobi, na wadau wengine husika, wakiwemo wahadhiri wa vyo vikuu katika taaluma za mazingira.

Aliwaomba washiriki kubuni ramani mwongozo wa jumla kuelekea kufikia mustakabali usio na kaboni na endelevu

katika sekta ya ujenzi Kenya.

Mukutano huo, amba mada yake ilikuwa "Kueleka Majengo Yenye Ufanisi na Ustahimilivu katika Sekta ya Ujenzi," lililenga kutoa mapendekezo ambayo yatatumika kupunguza athari za mabadiliko ya hali ya hewa nchini Kenya, alisema. Athari mabaya za mabadiliko ya hali ya hewa, alisema, zinazidi kudhahirika kote ulimwenguni, na kuongezeka kwa joto duniani, hali mbaya ya

hewa, kupanda kwa maji ya bahari, kupotea kwa viumbi hai na ardhi, zikiwa baadhi ya athari ambazo ulimwengu unapitia hivi sasa. Lilikuwa kongamano la kwanza la aina hiyo kufanyika nchini Kenya kujadili athari za mabadiliko ya hali ya hewa nchini Kenya, alisema. Athari mabaya za mabadiliko ya hali ya hewa, alisema, zinazidi kudhahirika kote ulimwenguni, na kuongezeka kwa joto duniani, hali mbaya ya

wabunifi pamoja na wahusika wengine katika mazingira wana uwezo wa kuleta mabadiliko kwa kutumia teknolojia ya matumizi ya nishati katika majengo na vya ujenzi vinavyopatikana ndani ya nchi.

Aliwahimiza kutekeleza mazoea ya ujenzi ambayo yatahakikisha kupunguza kiwango cha kaboni nchini Kenya. "Eneo la sakafu liliofunikwa na sekta ya ujenzi litaongezeka maradufu ifikapo

2050 na kuongeza zaidi ya mita bilioni 230 mraba katika ujenzi mpya wa majengo.

Katika bara la Afrika, eneo hilo linaweza kuongezeka mara tatu na labda mara nne katika nchi ambazo miji inakua kwa kasi kama vile Kenya," alisema.

Alisema sera na hatua madhubuti zinapaswa kutekelezwa ili kupunguza uzalishaji wa gesi chafu katika majengo yaliyopo na mapya yatakayojengwa

Stakeholders resolve to have informal sector workers register for pension schemes

BYCHARI SUCHE (KNA)

Kenyans in the informal sector have been urged to join pension schemes and commence saving for retirement to secure a good future once they exit from their jobs.

According to statistics by the Retirement Benefits Authority (RBA), despite the total assets under management amounting to over Sh1.7 trillion as of December 2023, only 26 per cent of the labour force is actively saving for retirement.

Speaking during the official opening of a five-day Huduma clinic in Mombasa meant to educate residents on the critical importance of saving for retirement, RBA Chief Executive Officer (CEO) Charles Machira said the public needs to be informed that formal employment is not a prerequisite for pension scheme enrolment, and it is important to save and plan for retirement.

Machira also urged

stakeholders in the pension industry, including the media, to reverse the trend of poor saving for retirement by enlightening Kenyans on the importance of retirement savings and the various options available.

He noted that sensitization through the Huduma clinic plays a profound significance particularly when considering the alarming statistics indicating that approximately seven out of 10 Kenyans face the risk of falling into poverty upon retirement due to inadequate savings.

The initiative targets informal sector workers, with the goal of enlightening them on the various avenues available for retirement savings.

“Additionally, for those already engaged in the sector, we continue to provide free retirement preparation training for scheme members nationwide,” he said.

He added that RBA is closely collaborating with other stakeholders, such as the individual pen-

sion plans represented, to raise awareness among all Kenyans regarding the importance of retirement savings.

He said instances of retirees encountering challenges in accessing their pension benefits have been noted over the years and promised to do a follow up and ensure every retiree gets their benefits 30 days after the day of retirement, as prescribed by the law.

Huduma Centre Chief Executive Officer Mugambi Njeru said Huduma Centres are ready to partner with RBA and bring services closer to the people, ensuring accessibility and inclusivity for all.

Mombasa Deputy County Commissioner Ronald Mwiwawi said the initiative will offer a prime opportunity for residents to learn how to start saving and secure their future.

Mwiwawi said the government is steadfast towards ensuring citizens do not retire into poverty and is promoting a culture of saving for retirement as a crucial step in achieving the goal.

Mahitaji mapya ya Usalama wa Mtandao yanalenga kulinda mashirika ya umma

NA MUTISO MBITHI (MY-GOV)

Bodi ya Viwango vya Uhasibu katika Sekta ya Umma (PSASB) imetangaza kutolewa kwa rasimu mpya ya Mahitaji ya Kisasa ya Usalama wa Mtandao yanayotolewa na Taasisi ya Kimataifa ya Wakaguzi wa Ndani.

Mahitaji ni mojawapo ya vipengele vitatu muhimu vya Mfumo wa Kimataifa wa Kitaalamu pamoja na Viwango vya Kimataifa vya Ukaruzi wa Ndani na Mwongozo wa Kimataifa uliopitishwa na Bodi ya Viwango ya Uhasibu katika Sekta ya Umma (PSASB).

Kulingana na Kaimu Afisa Mkuu Mtendaji wa PSASB, Georgina Muchai, Mahitaji ya Usalama Mtandaoni hutoa mbinu ya kina ya kutathmini muundo na utekelezaji wa usimamizi wa usalama wa mtandao, usimamizi wa hatari, na udhibiti wa michakato na hutumika kwa wale amba wanafanya ukagua manusi kwa shughuli hii.

Mahitaji ya Usalama Mtandaoni, Bi Muchai alisema, yanalenga zaidi kusaidia mashirika ya sekta ya umma katika kuanzisha

sera na taratibu zinazohusiana na utawala wa usalama wa mtandao, udhibiti wa hatari na michakato ya udhibiti, katika nia ya kuimarisha mazoea ya usalama wa mtandao na michakato ya udhibiti wa hatari, kuimarisha mazingira ya udhibiti, kazi za ukaguzi wa ndani, na kudhibiti ipasavyo hatari za usalama wa mtandao katika shughuli zao zote.

"Utekelezaji wa matakwa ya Usalama wa Mtandao utaimarisha ulinzi wa mali za habari za mashirika ya umma dhidi ya ufikiaji usioidhinishwa, usumbufu,

mabadiliko au uharibifu na kuimarisha mazingira ya jumla ya udhibiti ili kupunguza hatari," Afisa Mkuu Mtendaji alisema.

Alisema mashambulizi ya mtandao yanaweza kusbabisha athari za moja kwa moja na zisizo za moja kwa moja ambazo mara nyingi ni muhimu, kwani kompyuta, mitandao, programu, data na taarifa ni vipengele muhimu vya mashirika ya sekta ya umma.

"Kwa kuwa mashambulizi yanategemea sana rasili mali za teknolojia ya habari, baada ya kufafanua wazi mpango wa usalama wa

mtandao, malengo, hatari asilia, na udhibiti madhubuti unapaswa kuwa kipauzele kwa usimamizi," Kaimu Afisa Mkuu Mtendaji wa PSASB, Georgina Muchai alisema.

Alisema mahitaji ya usalama wa mtandao yana sehemu tatu, ambazo ni Utawala wa Usalama wa Mtandao, Usimamizi wa Hatari za Mtandao, na Michakato ya Kudhibiti Usalama wa Mtandao. Kila sehemu ina seti ya masharti ambayo mashirika ya sekta ya umma yanatarajiwa ku-fuata.

Alisema Kenya inakabil-iwa na ongezeko kubwa la mashambulizi ya usalama mtandaoni, huku uvamizi wa mara kwa mara uki-tokea kila siku kwenye tovuti na mifumo ya ICT ya mashirika ya sekta ya umma. Kati ya Januari na Machi 2024, Timu ya Kitaifa ya Kujihi Matukio ya Kompyuta ya Kenya - Kituo cha Uratibu kiligundua zaidi ya vitisho milioni 900 vya mtandao.

Mengi ya mashambulizi haya yalitumia udhaifu wa mfumo, ambao unawaeza kuhusishwa na kuenea kwa vifaa vya Intaneti (IoT).
